

## 1. AFFECTED PRODUCTS

Product Name	Hardware Revision	New Firmware Version	Comments
Dart2 4G	68.2	2.7	-
Dart2 2G	68.1	3.7	-

## 2. TYPE OF CHANGE

Hardware Modification

Firmware Modification

New Production Firmware

Critical Bug Fix

New Firmware Feature(s)

Improvement/Minor Bug Fix

Other, \_\_\_\_\_

Other, \_\_\_\_\_

## 3. DESCRIPTION OF CHANGE

From the date indicated in the schedule below, a new firmware release will be applied in production to the affected products. Currently versions 2.4 (4G) and 3.3 (2G) are being applied.

## 4. SCHEDULE

Estimated first shipment date	Product Name	Hardware Revision	New Firmware Version	Change
8 <sup>th</sup> Jan 2021	Dart2 4G	68.2	2.7	New firmware version applied to devices
8 <sup>th</sup> Jan 2021	Dart2 2G	68.1	3.7	New firmware version applied to devices

Note the Estimated first shipment date is the forecasted date that a customer may expect to receive a device on the new firmware. From the next production run (scheduled for December), we will be applying these firmware versions to new devices.

We will continue to ship older stock until this older stock has been depleted. Depending on demand, stock may be shipped after these estimated dates on older firmware.

## 5. CUSTOMER IMPACT AND RECOMMENDED ACTION

No action needs to be taken and it is not expected that there will be any customer impact.

The firmware change makes some minor changes to the [Autonet Table](#) – allowing some additional SIMs to get online automatically.

Further changes are covered in the release notes.
