

Yabby_{EDGE}

LTE-M / NB-IoT

Ultra-rugged and compact Indoor/Outdoor asset tracker. Features cloud-based location solving for 10+ years of battery life.

ndoor/Outdoor

GNSS, Wi-Fi AP MAC Address Scanning, and Cell Tower location fallback for seamless indoor/ outdoor asset management

'Deploy Once' Battery Life

Over 10+ years battery life on only 3 x AAA user-replaceable batteries

Cloud-Based Location

Position calculations are handled in the cloud (versus on-device) for substantial power savings

←ਰੈ Adaptive Tracking

Periodic or optional movementbased tracking - tracks assets throughout the day and/or when movement occurs, entering sleep mode when inactive to conserve power and data usage

Battery Life Alerts

"Battery Low" and "Battery Critical" alerts

්ට් Ultra-Rugged

IP67 rated housing ensures the device can withstand fine dust, high-pressure spray, submersion for 30 minutes in 1m of water

Connectivity

LTE-M / NB-IoT (supports roaming between networks - roaming SIM required)	Nordic nRF9160 Modem operates on all major global LTE-M and NB-IoT bands. Supported LTE bands: LTE-M (Cat-M1): B1, B2, B3, B4, B5, B8, B12, B13, B14, B17, B18, B19, B20, B25, B26, B28, B66 NB-IoT (Cat-NB1/NB2): B1, B2, B3, B4, B5, B8, B12, B13, B17, B19, B20, B25, B26, B28, B66
SIM Size & Access	Internal Nano 4FF SIM

Batteries

User-Replaceable Batteries	3 x AAA	
Supported Battery Types	Alkaline Lithium (LiFeS2) – Lithium recommended for best performance *Please dispose of Lithium batteries in a safe and responsible manner	
Battery Life	Once Daily location updates – 10+ years Movement-Based location updates – 4 years Hourly location updates – 2 years	

Location

Chipset	Semtech LR1110	
Constellation	Concurrent GPS and BeiDou	
Cloud-Based Solver	Asset location is calculated in Digital Matter's Location Engine	
Tracking Sensitivity	-134 dBm autonomous / -141 dBm aided	
GNSS Assistance	GNSS almanac data for greater sensitivity and position accuracy	
Low Noise Amplifier	GPS signals are filtered and boosted by a SAW filter and low-noise amplifier (LNA) allowing operation where other units fail	
Cell Tower Location	Cell tower fallback for positioning when there is no GNSS or Wi-Fi signal	
	Indoor asset location using Wi-Fi access point scanning (device does not connect to Wi-Fi)	

Power

Input Voltage	3-5.5V DC
Sleep Current	<10uA* *Average current in lowest power configuration

Mechanics / Design

Dimensions	Standard - 85 x 63 x 24 mm (3.35 x 2.48 x .94") Livestock Collar - 109 x 60 x 30 (4.29 x 2.36 x 1.18") Snap Housing (Smallest Size, not IP67 rated) - 75 x 45 x 25 mm (2.95 x 1.77 x 0.98")
Weight	Standard - 82 g (2.9 oz)
Housing	Ultra-Rugged IP67 Housing

Mechanics / Design (continued)

IP Rating	IP67 rated housing ensures device can withstand fine dust, high-pressure spray, submersion for 30 mins in 1m of water, and extreme temperatures			
Installation	Compact and concealable. Multiple installation options for covertly and easily securing the device to assets with screws, bolts, cable ties, rivets, and more. Collar housing available for securing device to livestock.			
Operating Temperature	-30°C to +60°C - for operation in extreme temperatures use Lithium Batteries			
Cellular Antenna	Internal			
GPS Antenna	Internal			
Wi-Fi Antenna	Internal			
3-Axis Accelerometer	3-Axis Accelerometer to detect movement, high G-force events, and more			
Diagnostic LED	Diagnostic LED indicates operation status			
Flash Memory	Store weeks of records if device is out of cellular coverage. Storage capacity for over 5 days of continuous 30-second logging.			
Speed and Heading	Scanning technology used on the Yabby Edge does not return speed and heading			
On-Board Temperature	The device reports internal temperature which provides an indication of ambient temperature but may not always be precise			

Smarts

Auto-APN	Auto-APN allows the device to analyze the SIM card and select the correct APN details from a list that is pre-loaded in the device's firmware			
Battery Life Monitoring	"Battery Low" and "Battery Critical" alert levels			
Geofence Alerts	The server can use device location to create geofences and alerts if an asset enters or leaves designated locations			
Impact Detection	Configure impact-detection alerts when G-forces are exceeded by a user-defined threshold			
Intelligent Power Management	nent Early registration abort and location scan throttling options			
Periodic or Movement-Based Tracking	Configure parameters to send updates based on set time intervals or when movement occurs. Adaptive tracking technology detects when the device is on the move and increases the update rate, providing detail when you need it while conserving battery when stationary.			
Preventative Maintenance	Set reminders based on distance traveled and run hours to reduce maintenance and repair costs			
Run Hour Monitoring	Capture run hours based on movement to understand and optimize asset utilization			
Sleep Mode	Stationary devices enter sleep mode until movement occurs to conserve battery life and optimize ousage			
Theft Recovery	Switch to Recovery Mode in the case of theft or loss to activate real-time tracking for asset retrieval			
Tip Detection & Rotation Counting	Axis angle reporting, tip detection and rotation counting			

Device Management

Flexible Configuration	Configure device parameters such as position update rate, movement and accelerometer settings, and more to fit any tracking application
Device Management Platform	Manage, monitor, configure, debug, update, and restart devices remotely from our cloud-based device management system

03 - YABBY EDGE CELLULAR www.digitalmatter.com

Integration

Third-Party Integration	HTTPS Webhook
Cloud-Based Solver	Digital Matter's Location Engine makes it easy to perform cloud-based position solving and integrate data into any system
Configuration App	Configurable with DMLink Provisioning tool

Security

Data Security	Military-level AES-256 Encryption from device to OEM Server to protect the integrity and confidentiality of telematics data. Data forwarded to third-party systems is sent via HTTPS for end-to-end security.
